Definitions:

Adult Care: Provides care outside the home. Participants have the opportunity to interact with others while being part of a safe and structured environment. Centers typically have staffed activities such as music and exercise programs and discussion groups

Adult Day Care programs include supervision, recreation, socialization, exercise, meals, and group activities. Facilities are licensed by the **Department of Human Services, Adult & Community Care Services Branch**. Most centers require participants to be 55 years or older, ambulatory, continent, a non-wanderer, non-combative, able to eat independently and transfer with little or no assistance. Some provide additional assistance or special services, usually for an added cost.

Adult Day Health programs are for those who require a higher level of care, usually intermediate care facility (ICF) level. Services could include health assessments, administration of medication, or care coordination. There may also be specialized care such as programs for dementia patients. Adult Day Health Centers are staffed with Registered Nurses who are qualified to dispense medication and provide skilled nursing level care. Facilities are licensed by the **Department of Health, Office of Health Care Assurance**. These facilities require TB and medical clearance (physical exam). Some providers will suggest a trial period if they are unsure your family member is appropriate for their program.
